INTRODUCTION.

CLASSIFICATION OF CANADIAN STATIONS.

The classification which has obtained in the Meteorological Service of the Dominion of Canada is as follows:—

Chief Stations, where all the ordinary observations are taken day and night at equal intervals of time not exceeding four hours.

Telegraph Reporting Stations, where all the ordinary observations are taken three times daily at the same absolute time, namely 8 A.M., 3 P.M. and 8 P.M., 75th Meridian time, and the first and last are reported by telegraph as soon as taken, to the Central Office at Toronto.

Ordinary Stations of the First Class, where all the ordinary observations are taken three times daily at certain local times.

Ordinary Stations of the Second Class, where regular observations of temperature, extremes of temperature, the direction and velocity of the wind, and the state of the weather, are taken three times daily at regular local times, the rainfall and snowfall also being measured.

Ordinary Stations of the Third Class, where records are kept of the fall of rain and snow, and the general state of the weather.

STATIONS in operation during 1897 [with the Latitude, Longitude, and Height above Sea when known, also the class of each Station.

(a) Chief Station—(I) First-class Station—(II) Second-class Station—(III) Third-class Station—(T) Telegraph Station—(S) Sunshine registered.

BERMUDA—Prospect.....	37 20	64 50	150	T	The Senior Medical Officer.

It will be seen that during 1897 there were in the Dominion 314 stations at which observations were taken and forwarded to Central Office at Toronto. At Chief Stations, Telegraph Stations and some few of the Special Stations the observers are paid for the time which they devote to observing duties, but at the bulk of the stations the work performed is purely voluntary, the Department simply supplying the necessary instruments, and to these volunteer observers, who in the interest of their country and of science devote their time gratuitously to their work, is due the thanks of the Canadian public and of this service in particular.

The observations telegraphed to the Central Office for the purpose of forecasting are those taken at 8 a.m. and 8 p.m., 75th Meridian Time, at 30 stations between British Columbia and Newfoundland. They are as follows:—Esquimalt, Kamloops, Calgary, Edmonton, Medicine Hat, Prince Albert, Battleford, Swift Current, Qu'Appelle, Minnedosa, Winnipeg, Port Arthur, White River, Parry Sound, Southampton, Port Stanley, Kingston, Rockliffe, Ottawa, Montreal, Quebec, Father Point, Anticosti (Southwest Point), Chatham, Grand Manan, Yarmouth, Halifax, Charlottetown, Sydney, St. John's (Newfoundland). The whole of these reports are usually received in Toronto before 9.30 o'clock, and the majority of them are forwarded on to the United States Weather Bureau, Wash-

ington, which Bureau in return supplies this office with some fifty-four reports from stations scattered over the United States, and we are thus provided with a very comprehensive synoptic chart on which to base our forecasts. The chart is usually ready for use at a quarter to ten a.m. and p.m., and the forecast official then proceeds to draw the isobars, &c., &c. Since August, 1896, between sixty and seventy copies of the chart have been struck off by means of the mimeograph, a duplicating machine, and supplied to various shipping firms, the Toronto Board of Trade, to some of the public schools and to such persons in Toronto and Hamilton as agree to post them where they may be seen by the public.

When it is considered necessary, warnings of gales are despatched to the various storm signal stations in the Dominion, which number sixty-nine, thirty-three being on the great lakes and thirty-six on the coasts of the Gulf of St. Lawrence and the Maritime Provinces. The accompanying cut shows the signals used for warning purposes, and following it is a list of the stations.

- No. 1.—Moderate gale at first from an Easterly or Southerly direction.
 No. 2.—Moderate gale at first from a Westerly or Northerly direction.
 No. 3.—Strong gale at first from an Easterly or Southerly direction.
 No. 4.—Strong gale at first from a Westerly or Northerly direction.

Port Arthur.	Fox River,	Sarnia,	Port Dalhousie,
Fort William.	Grand River,	Amherstburg,	Port Credit,
Sault Ste Marie,	Dalhousie,	Oakville,	Trenton,

Deseronto,	Bayfield,	Liverpool,	Point LePreau,
Kingston,	Goderich,	St. John,	Summerside.

During the year 1,463 storm warnings were issued to the various districts in Canada where signals are displayed, and of this number 1,251 or 85.5 per cent were verified; of this latter number, however, on eighty-four occasions the wind did not reach and on eighty-seven occasions exceeded the force as indicated by the signals displayed; also eighty-two of the warnings were received late owing to issue and forty-two on account of delay in transmission. In connection with the warnings the probable directions from which the gale would blow were also given, and of the 1,251 warnings verified as to force, 1173 or 93.8 were fully and 1241 or 99.2 per cent fully and partially verified.

Forecasts were issued twice each day to the following districts: Manitoba, Superior, Georgian Bay, Lower Lake Region, Ottawa Valley, Upper St. Lawrence, Lower St. Lawrence, Gulf and

stations scat-

Maritime Provinces, east and west. The morning forecast is regarded as being more especially for the benefit of mariners, and is posted up in all the principal ports in the Dominion, besides at many inland places, it usually covers both the day of issue and the day following, and a special effort is made to accurately predict the force and direction of the winds. The forecasts issued at 10 p.m. are telegraphed that same evening to all places issuing morning papers in which in nearly all instances they are published, and besides this, east of Regina, Assa., as soon as the telegraph offices open in the morning the first thing sent over the wires is the forecast for the coming day which is posted in a conspicuous place. In order to disseminate more generally the daily forecasts to the agricultural community, through the co-operation of the principal railways, discs indicating the weather to be expected are each day displayed on the baggage vans of outgoing morning trains, and thus farmers living far from a telegraph office may obtain a general knowledge of the daily forecasts.

EXPOSURE OF INSTRUMENTS.

Thermometers.—The thermometer shelter represented in Fig. II consists of an inner screen and an outer shed. The screen, Fig. I is a rectangular case formed on its four sides and bottom by thin louvre slats of sheet iron, which intercept heat rays but freely admits air. The top is closed to guard against drifting snow which might possibly settle on it, and in melting drop on the thermometers. The thermometers are attached to a frame formed of two strips of hoop iron stretched from end to end between the front and the back of the screen. The ordinary mercurial thermometers are fastened at the end of the frame to the ends of brass bows, which project forward, the centres of the bows being screwed to the horizontal frame, while the self-registering thermometers are suspended by hooks, which by means of pinching screws can be fixed in positions suited for giving to the thermometers the required slope. As the screen alone is insufficient to protect the thermometer from the sun and rain it is placed under a thermometer shed which has a double roof with an air space open to the east and west, with sides formed of wooden louvre slats, with louvre doors on the north face, and a back towards the south of close half inch boarding. Within the shed and to the north side of its back, the screen is attached by four iron brackets with an interval of two inches between the back of the shed and the southern face of the slats of the screen.

To protect the thermometer shed from the southern sun, it is attached at a distance of two inches to a double fence, as represented in Fig. II.

FIG. I.

FIG. II.

The dimensions of screen shed and fence expressed in inches are as follows:—

	Screen.	Shed.
Length from East to West	24	37
Depth from North to South	8	18
Height	18	{ At Front 29 At Back 31

DOUBLE FENCE.

Length from East to West	72
Interval between front and back	4
Height	84

The general instructions regarding the position of the shed are that it should be placed facing north, and, if possible, at such a height that the bulbs of the thermometers may be four feet above the soil.

Anemometers.—Anemometers are always placed in the position with the best exposure that can be obtained at the station, and they are placed at such a height above the building on which they stand as to escape the eddies caused by the reaction of these buildings on the wind.

Rain Gauge.—The rain gauge is placed in such a position that its mouth may be one foot from the ground.

PART I.

Monthly and Annual Summaries from Telegraph and Ordinary Stations of the First Class during the Year 1897.

Pressure.—The monthly means and extremes pressures have been reduced to 32° Fahr. and corrected for instrumental error. No gravity correction has been applied.

Temperature.—The monthly means have been obtained from the formula $\frac{\text{max.} + \text{min.}}{2}$.
The extremes are for the 24 hours 8 p.m. to 8 p.m.

Precipitation.—The maximum precipitation in any one day is for the 24 hours ending at 8 a.m.

Cloudiness.—The cloudiness is the average of three estimates made during the day. A day is termed "clear" when the amount of cloud is less than 30 per cent.

METEOROLOGICAL TABLES.

THE WEATHER OF 1897.

The following summary is deduced from observations taken at stations south of Latitude 50° in Ontario, Quebec and the Maritime Provinces, and south of 55° in British Columbia, the Territories and Manitoba.

JANUARY.—Throughout the Dominion, with some local exceptions, the weather was fine, comparatively mild and dry; and the barometric pressure was from .05 to .10 of an inch above average west of Manitoba and average elsewhere. The greatest range, 2.16 inches, occurred at Edmonton, N.W.T. The mean temperature which generally exceeded the average, showed the greatest excess in portions of the Territories, Calgary giving + 11°.2; whilst in south-western Ontario and the Maritime Provinces, it was average or below at many stations. The highest temperature recorded was 61°.0 at St. George, Ont., on the 4th, and the lowest —60°.0 on the 19th, at Savanne and Nepigon north of Lake Superior, in Ontario, on the 4th. The mean daily range exceeded 20° at comparatively few stations, and only reached 24°.8 at one station. In the northern portion of Ontario, and western portion of the Maritime Provinces the precipitation exceeded the average, but elsewhere it was generally below; the greatest amounts recorded were 15.7 inches at Port Simpson, B.C.; 10.5 inches at Quatsino, B.C.; 11.7 at Clayoquot, B.C.; and 7.54 at Bognor, Ont. The prevailing winds at selected stations were north at Esquimalt, B.C., east at Kamloops, B.C., west at Calgary, N.W.T., north at Prince Albert, N.W.T., north-west at Battleford, N.W.T., north-west at Minnedosa, Man., west at Winnipeg, Man., north-west at Port Arthur, Ont., west at Parry Sound, Ont., west at Port Stanley, Ont., west at Toronto, Ont., west at Ottawa, Ont., south-west at Montreal, Que., south-west at Quebec, Que., west at Chatham, N.B., west at Grand Manan, N.B., north-west at St. John, N.B., north-west at Halifax, N.S., and north-west at Sydney, N.S. The proportion of bright sunshine registered (possible amount being 100), was 17 at Esquimalt, B.C., 23 at Agassiz, B.C., 33 at Battleford, N.W.T.; 36 at Brandon, Man.; 40 at Winnipeg, Man., 26 at Toronto, 17 at Barrie, Ont., 32 at Kingston, Ont., 43 at Montreal, Que., and 40 at Fredricton, N.B. The mean amount of cloud (10 being completely overcast), was 6.9 in British Columbia, 4.9 in the Territories, 4.3 in Manitoba, 7.0 in Ontario, 6.0 in Quebec, 5.0 in New Brunswick, and 6.8 in Nova Scotia. Five gales were reported from Manitoba and the same number from the Maritime Provinces. Thunder was recorded at several places in British Columbia and Ontario. Fogs were reported from each province, but with the exception of 23 at Port Simpson, 14 at New Westminster, B.C., and 8 at Rivers Inlet, few were recorded. At Victoria, B.C., snowdrops were in bloom on the 6th, and crocuses on the 30th.

FEBRUARY.—The comparatively even meteorological conditions of January were somewhat broken in February, nevertheless the barometric pressure was persistently high, being .05 to .10 inches above average west of Lake Superior and average elsewhere. The temperature also exceeded the average in most districts. The highest temperature recorded was 61°.0 at Agassiz on the 26th, and the lowest —54°.8 at White River, north of Lake Superior, Ont., on the 26th. The mean daily range was not unusually high excepting 30°.4 at White River, Ont., and 31°.8 at Desbarats, Ont. The precipitation was about average in British Columbia, the Territories and Manitoba, and below elsewhere; the deficiency was generally small, but in New Brunswick it exceeded two inches in many places. The proportion of bright sunshine was below average at stations in British Columbia and Manitoba, also at some places in the Territories and Ontario, whilst it was above at stations in Quebec and the Maritime Provinces, also at Barrie and Kingston, in Ontario. The mean amount of cloud was 6.1 in British Columbia, 4.2 in the Territories, 3.7 in Manitoba, 6.1 in Ontario, 4.6 in Quebec, 4.1 in New Brunswick, and 5.1 in Nova Scotia. The prevailing direction of the wind was north at Esquimalt, B.C., north at Port Simpson, B.C., east at Kamloops, B.C., west at Swift Current, N.W.T., north-west at Edmonton, N.W.T., south-west at Prince Albert, N.W.T., south-east at Battleford, N.W.T., north-west at Minnedosa, Man., south-east at Winnipeg, Man., north-west at Port Arthur, Ont., west at Parry Sound, Ont., west at Port Stanley, Ont., north at Toronto, Ont., south-west at Montreal, Que., north-east and west at Quebec, Que., west at Chatham, N.B., north-west at St. John, N.B., west at Grand Manan, N.B., north-west at Halifax, N.S., and north-west at Sydney, N.S. Thunder was reported from Kamloops, B.C., and from Clayoquot, B.C. A few fogs in each province were recorded, the greatest number occurring at any station being 8 at Quatsino, B.C., 5 at New Westminster, B.C., and 4 at St. John, N.B. By the 3rd the trees were budding, and many migratory birds had arrived in British Columbia. The depth of snow on the ground at the end of the month was 20 inches at Barkerville, B.C., 72 inches at Glacier House, B.C., 36 inches at Revelstoke and Donald, B.C.; from Kamloops to the Coast the ground was bare. At Edmonton and Battleford,

N.W.T., the depth was 16 inches, at Minnedosa, Man., 30 inches, and at Winnipeg, Man., 18 inches. In Ontario the depth was from 2 to 20 inches in southern districts, and from 20 to 30 inches or more in northern districts. In Quebec and the Maritime Provinces it was generally from 2 to 30 inches. The thickness of ice on the 28th was 24 inches at Battleford, 30 inches at Regina, N.W.T., 30 inches at Port Arthur, Ont., 10 inches at Port Stanley, Ont., 15 inches at Kingston, Ont., 20 inches at Lakefield, Ont., 22 inches at Chatham, N.B., and 30 inches at Fredricton, N.B.

MARCH.—The weather of March was for the most part cold and wet in British Columbia, cold and dry in the Territories, cold and wet in Manitoba, and mild and wet in Ontario, Quebec and the Maritime Provinces. The mean barometric pressure decreased somewhat to the west of Lake Huron, and increased elsewhere, it being average to .05 of an inch above throughout the country. The mean temperature was below average in British Columbia, the Territories and Manitoba, and generally above eastward to the Atlantic. The chief deficiencies recorded were 15°·4 at Quesnelle, B.C., and 16°·2 at Medicine Hat, N.W.T., and the chief excesses at 9°·2 at St. Annes, Ont., and 9°·0 at Millbrook, Ont., they being unimportant east of Ontario. The highest temperature recorded was 64° at Tilsonburg, Ont., on the 31st, and the lowest —49° at Henrietta, N.W.T. on the 15th. The mean daily range exceeded 20° at most places in the Territories and Manitoba, but with the exception of 32°·4 at Quesnelle, B.C., and 31°·3 at Sturgeon Lake, N.W.T., the range was nowhere excessive. The precipitation was above average at most stations in British Columbia, below in the Territories and above at nearly all places eastward to the Atlantic Coast; the greatest excess, regardless of individual stations, occurred in Ontario, and the greatest deficiency in the Territories. The prevailing winds, and the mean velocity from all directions at selected stations were as follows: Esquimalt, B.C., between north-west and south-west, 8·3 miles; Swift Current, N.W.T., south and south-east, 4·8 miles; Prince Albert, N.W.T., south-east, 8·2 miles; Stony Mountain, Man., north-west, 4·5 miles; Port Arthur, Ont., north-east to north-west, 4·6 miles; Port Stanley, Ont., east and north-west, 12·6 miles; Toronto, Ont., north-east and west, 16·8 miles; Montreal, Que., north-east and south-west, 15·6 miles; Quebec, Que., north-east and south-west, 16·2 miles; St. John, N.B., north-west, 11·3 miles; Halifax, N.S., north-west, 11·8 miles. The proportion of bright sunshine varied but did not differ very much from average anywhere. Thunderstorms occurred at many places in Ontario and Manitoba, but in other portions of the Dominion a few only were reported. Fogs were recorded on 7 days at Erasmus, Ont., and at St. John, N.B., this number being exceptional; in British Columbia few were noted, but elsewhere they were almost general on from 1 to 6 days. In British Columbia vegetation was very backward, but the grass was green and wild flowers were blooming on the 31st. At Medicine Hat, N.W.T., the snow had disappeared by the 31st, and ice upon rivers was breaking up. In Ontario crocuses and snowdrops were in bloom towards the end of the month. In Quebec and New Brunswick the snow was melting rapidly, and in Nova Scotia the ground was bare on the 31st.

APRIL.—The barometric pressure continued high and during the month increased over British Columbia, the mean being about .15 of an inch above average over this Province, and from average to .10 above over the Territories and eastward to the Atlantic Coast. The highest pressure recorded was 30·76 inches at White River, Ont., and Woodstock, Ont., and the lowest 29·08 at Battleford, N.W.T. The greatest range was 1°·56 at Port Arthur, Ont. The mean temperature, with a few local exceptions, was above average throughout the Dominion, the chief excesses occurring in British Columbia and the Territories, several stations reporting + 6° and + 7°. The highest temperature was 90° on the 26th at Fort Steele, B.C., and the lowest —20° at Misanabie, Ont., on the 19th. The mean daily range was generally from 20° to 25° at stations in British Columbia, the Territories, Manitoba, and northern Ontario, and at most places elsewhere below 20°. The greatest range 32°·6 occurred at Fort Steele, N.B., this being the only station where it was excessive. In portions of British Columbia and as far east as Lake Huron the rainfall was below average, elsewhere however with a few local exceptions it was above. The chief excess occurred in Nova Scotia, and the chief deficiency in British Columbia. The prevailing direction of the wind was south west at Esquimalt, B.C., south-west at Chilliwack, B.C., north-west at Swift Current, N.W.T., north and south at Prince Albert, N.W.T., north at Winnipeg, Man., north-east at Port Arthur, Ont., south-west at Port Stanley, Ont., west at Toronto, Ont., south-west at Montreal, Que., north-east at Quebec, north at Grand Manan, N.B., north-west at Halifax, and south-west at Charlottetown, P.E.I. No thunderstorms were reported from British Columbia, and only one each was noted in the Territories and the Maritime Provinces, elsewhere they were general. At Port Simpson, B.C., 21 fogs occurred, and in the Maritime Provinces from 1 to 17 were reported; elsewhere, from 1 to 5 were recorded at many places. At stations in British Columbia and the Territories the proportion of bright sunshine was above average but in the other provinces it was below. On the lower mainland of British Columbia cherry and plum trees were in bloom on the 17th. At Kamloops, B.C., trees were almost in leaf on the 30th. At Edmonton, N.W.T., wheat was above ground, and some trees were in leaf on the 30th, and on the same date anemones were in flower at Regina, N.W.T. At Minnedosa, Man., wild ducks appeared on the 10th. At Port Arthur swallows arrived on the 23rd. At Gravenhurst wild ducks and wading birds were recorded on the 11th. At London, Ont., maple and other trees were bursting into leaf on the 30th. At Quebec, Que., navigation

was open on the 25th. At Charlottetown, P.E.I., trailing arbutus was in bloom on the 27th. At St. John, N.B., navigation on the St. John River opened on the 24th, and grass was everywhere quite green on the 27th.

MAY.—In the most eastern and most western portions of the Dominion the barometric pressure decreased during the month, and throughout the country the mean was average or .05 of an inch above. The highest pressure recorded was 30.46 inches at Swift Current, N.W.T., and the lowest 29.28 inches at Edmonton, N.W.T. The greatest range, 1.02 inch occurred at Swift Current, N.W.T. In British Columbia, the Territories and Manitoba the temperature was well above average; it was also above in the Maritime Provinces, whilst in Ontario and Quebec it was below. The greatest excesses in the Provinces referred to were as follows: 11°.5 at Tobacco Plains, B.C., 9° 9 at Macleod, N.W.T., 4° 9 at Minnedosa, 4° 9 at Bathurst, N.B., 4° 0 at Pictou, N.S.; and the greatest deficiencies were 6° 7 at Cartier Ont., 7° 3 at East Point Anticosti, Que. The highest temperature, 104° 8 at Spence's Bridge was recorded on the 29th, and the lowest, 15° 0 at Savanne, Ont., occurred on the 1st. The mean daily range of temperature was unusually high in British Columbia, the Territories and Manitoba, 30 being exceeded at many places; elsewhere the range was not excessive. In British Columbia, the Territories and Manitoba with few exceptions the rainfall was below average, but in other portions of the country it was above; the chief deficiency occurred in British Columbia, and the chief excess in New Brunswick. The prevailing direction of the wind was south-west at Esquimalt, B.C., west at Rivers Inlet, B.C., south-east and north-west at Battleford, N.W.T., south-east and north-west at Russell, Man., north-east at Port Arthur, Ont., north at Port Stanley, Ont., north-west at Lindsey, Ont., south-west at Montreal, Que., north-east at Quebec, south at St. John, N.B., south at Halifax, N.S., and south-west at Sydney, N.S. Thunderstorms occurred at many places throughout the country, they being most prevalent in Ontario. Fogs were reported in many districts, more especially in Quebec and the Maritime Provinces, 15 being recorded at Point Lepreau, N.B., and nineteen at Whitehead, N.S. At Port Simpson, B.C., 27 were noted, but with the exception of 5 at River's Inlet, B.C., these were the only fogs reported from British Columbia. Vegetation both in British Columbia, the Territories and Manitoba was rather backward owing doubtless to the light rainfall. At Collingwood, Ont., cherry trees were in bloom on the 12th, apple trees on the 23rd, and swallows arrived on the 1st. At Georgetown, Ont., strawberries were in bloom on the 8th, maples were in leaf on the 21st, apples in blossom on the 10th, and humming birds were seen on the 17th. At Gravenhurst, Ont., plum trees were in bloom on the 11th, and apple on the 24th. In Quebec and the Maritime Provinces vegetation was very backward.

JUNE.—Throughout the greater portion of the country the pressure decreased during the month of June, the mean being about average everywhere excepting in Quebec and the Maritime Provinces where it was about .05 below. The highest pressure, 30.62 inches occurred at Haileybury, Ont., and the lowest, 29.25 inches at White River, Ont. The greatest range, 1.08 occurred at Calgary. In British Columbia and the north-west portion of the Territories the temperature was above average, whilst elsewhere, with a few local exceptions, it was below. The highest temperature reported was 102° on the 13th at St. Albans, Man., and the lowest 19° 0 on the 5th at Rosebank, Man. The mean daily range, though nowhere excessive, excepting at Quesnelle, B.C., where it was 38°, was generally above 20° in the Territories, Manitoba and Ontario. The rainfall was above average at most stations in British Columbia, the Territories, Ontario, Quebec and the Maritime Provinces, but in many localities it was average or below, and in Manitoba it was below throughout the Province. The chief excess occurred in the Territories, and the chief deficiency in Manitoba. The prevailing direction of the wind at selected stations was south-west at Esquimalt, Hazelton and Chilliwick, B.C., north at Swift Current, N.W.T., south-east at Battleford, N.W.T., north at Winnipeg, Man., west at Port Arthur, Ont., south-west at Port Stanley, Ont., north at Toronto, Ont., south-west at Montreal, Que., north-east at Quebec, west and south-west at Grand Manan, N.B., north-west at Halifax, N.S., and south-west at Charlottetown, P.E.I. The mean amount of cloud was 6 in British Columbia, 5 in the Territories, 5 in Manitoba, 5 in Ontario, 5 in New Brunswick and 6 in Nova Scotia. Thunderstorms occurred at most stations excepting in districts contiguous to the Pacific and Atlantic Coasts, where few were recorded. Fogs were observed at many stations, but excepting 20 at Port Simpson, B.C., 9 at River's Inlet, B.C., 6 at Toronto, Ont., 6 at West Point, Anticosti, Que., 8 at Point Le Preaux, N.B., and 5 at Whitehead, N.S., the number noted at any place did not exceed 4, and in most cases there were only 1 or 2. Light ground frost occurred on the mainland of British Columbia on the 10th and 11th, but little damage was done and vegetation was in normal condition. Lilac was in bud at Oonikup, The Pas, N.W.T., on the 30th. Wheat was in head at Brandon on the 28th. At Clontarf, Ont., white clover was in bloom on the 11th, and red and alsike clover on the 16th. At Barrie, Ont., lilac bloomed on the 5th, maples were in full foliage on the 7th, and fireflies were seen on the 28th. At Sarnia, Ont., alsike clover was in bloom on the 13th. At Ottawa, barley was headed by the 24th, and wheat by the 26th. At Beatrice, Muskoka, Ont., night-hawks were first seen on the 5th, and fireflies on the 29th. In Quebec and the Maritime Provinces vegetation was backward.

JULY.—During the month of July the barometric pressure decreased considerably over the country west of Lake Superior, where it was from .05 to .10 of an inch below average, it increased over Quebec and the Maritime

Provinces decreased inches at at Swift Territories reported range exceeded Territories south-west N.W.T., Stanley, N.B., and except Territories storms a few st Chilcotin fogs at N.B., 1 Chilliwa wheat raspberries barley at Quebec

Briti

Provinces where it was from .05 to .10 above average, it remained almost stationary over eastern Ontario, and decreased to .04 below average in western and north-western Ontario. The highest pressure recorded was 30.52 inches at Haileyburg, Ont., and the lowest, 29.01 inches at Battleford, N.W.T. The greatest range, 1.16 occurred at Swift Current, N.W.T. The mean temperature was generally below average in British Columbia and the Territories, and above elsewhere; in many districts in Ontario it was from 4° to 6° above. The highest temperature reported was 102° 0 on the 28th, at Gatesgarth, N.W.T., and the lowest 30° 0 on the 25th, at Barkerville, B.C. The range exceeded 20° at a large number of stations, and at a few places in British Columbia and the Territories it exceeded 30°, 38° 3 occurring at Gatesgarth, N.W.T. The rainfall was above average in British Columbia, the Territories and Ontario, whilst elsewhere it was about average. The prevailing direction of the wind was south and south-west at Esquimalt, B.C., west at Quatsino, B.C., west at Swift Current, N.W.T., south-east at Prince Albert, N.W.T., north-west at Minnedosa, Man., south-east at Winnipeg, Man., east at Port Arthur, Ont., west at Port Stanley, Ont., south at Lindsay, Ont., south-west at Montreal, Que., north-east at Quebec, Que., south at St. John, N.B., and south-west at Halifax, N.S. The proportion of bright sunshine was below average at all stations except Barrie, Ont., where it was .03 above. The mean amount of cloud was 5.2 in British Columbia, 5.3 in the Territories, 5.2 in Manitoba, 4.6 in Ontario, 5.0 in Quebec, 5.2 in New Brunswick, and 5.8 in Nova Scotia. Thunderstorms were general throughout the Dominion excepting in British Columbia, where they were only reported from a few stations, 12 were recorded at Alton, Ont., 11 at Erasmus, Ont., 10 at Beatrice, Ont., and Galt, Ont., and 9 at Chilcotin, B.C., Whiteside, Ont., Port Stanley, Ont., Lucknow, Ont., and Bancroft, Ont. With the exception of 28 fogs at Port Simpson, B.C., 9 at River's Inlet, 15 at Biquette, Que., 16 at Grand Manan, 20 at Point Lepreaux, N.B., 16 at Yarmouth, N.S., and 13 at Whitehead, N.S., only from 1 to 5 were recorded at a few places. At Chilliwack, B.C., wheat was ripe on the 29th. At Swift Current, N.W.T., haying commenced on the 31st, and wheat was ripe on the 26th. At Brandon wheat was nearly ripe on the 31st. At Minnedosa, Man., wild raspberries were ripe on the 31st. At London, Ont., wheat was ripe about the 20th. At Otonabee, Ont., rye, barley and wheat were ripe on the 20th. At Collingwood, Ont., spring wheat was in blossom on the 18th. In Quebec and the Maritime Provinces vegetation was normal.

AUGUST.—The barometric pressure increased generally west of Lake Superior, also in Quebec and the Maritime Provinces, and remained stationary in Ontario. In British Columbia it was about .05 below average, in the Territories and Manitoba from average to .05 above, and elsewhere it was average to .04 of an inch below. The highest pressure observed was 30.55 inches at Haileyburg, Ont., and the lowest 29.21 inches at Port Simpson, B.C., highest range, 1.15 occurred. In British Columbia and the Territories the temperature was above average, but in other portions of the country it was generally below. The highest temperature recorded was 103° at Gatesgarth, N.W.T., on the 11th, and the lowest, 25° 7 at Henrietta, Man., on the 29th. In British Columbia and the Territories the mean daily range at many stations was unusually high, 38 occurring at several places. In Manitoba and Ontario the range was also high, but in other Provinces it was normal. The rainfall was about average throughout the country, excepting in Ontario, where it was slightly above at most stations. The proportion of sunshine was below average at stations in Quebec and the Maritime Provinces, but above elsewhere. The mean amount of cloud was 3.6 in British Columbia, 4.2 in the Territories, 4.4 in Manitoba, 4.2 in Ontario, 5.7 in Quebec, and 5.3 in the Maritime Provinces. The prevailing direction of the wind was south at Esquimalt, B.C., south-west at Kamloops, B.C., north at Swift Current, N.W.T., north-west at Prince Albert, N.W.T., north-west at Minnedosa, Man., north-west at Winnipeg, Man., west at Port Arthur, Ont., west at Parry Sound, Ont., south-west at Port Stanley, Ont., north-west at Toronto, Ont., south-west at Montreal, Que., south-west at Quebec, west at Father Point, Que., west at Chatham, N.B., south-west at St. John, N.B., west at Halifax, N.S., and south-west at Sydney, N.S. There were few storms during the month, but velocities of 32.7 miles from the west were recorded at Quebec on the 26th, 31.7 from the west at Winnipeg, Man., on the 26th, and 28.7 miles from the west at Swift Current, N.W.T., on the 13th. Thunderstorms occurred at most stations throughout the country, the least number being reported from British Columbia and the Maritime Provinces. In Quebec and the Maritime Provinces fogs were recorded at many stations, the greatest number being 16 at St. John, N.B., 14 at Point Le Preaux, and 12 at Grand Manan, N.B., 9 at Biquette, Que., and 8 at Yarmouth, N.S.; at Port Simpson, B.C., 18, and Rivers Inlet, B.C., 11 were noted, but few were recorded in other portions of the Dominion. In British Columbia frosts occurred at many places, but caused little or no damage, vegetation being in excellent condition on the 31st. At Regina, N.W.T., grain crops were nearly all harvested by the 31st. At Pembina Crossing, Man., harvesting commenced about the 13th. At Emo, Rainy River, Ont., grain harvesting opened on the 16th. At Parry Sound, Ont., grain cutting was started on the 31st. At Wyoming, Ont., the foliage of trees showed little change on the 31st. At Aurora, Ont., grain crops were all housed by the end of the month. At Elgin, Ont., a few leaves on the trees were changing colour on the 31st. In Quebec, frosts occurred on the 23rd doing considerable damage to vegetation, and harvesting was unusually late. In the Maritime Provinces vegetation was very backward and grain crops were only fair.

SEPTEMBER.—During September the barometric pressure increased considerably east of Manitoba and in British Columbia, decreased in the southern portion of the Territories, and remained stationary elsewhere. In

it soon disappeared. Previous to this the weather was unusually warm in Ontario. Swallows returned to Toronto on the 8th, raspberry bushes at Bognor were blooming on the 1st for the second time, and raspberries were ripe on the 15th. At Owen Sound, Ont., wild strawberries were gathered early in the month. Trees were defoliated about the 25th in most districts. In Quebec and the Maritime Provinces frosts occurred upon several days but the trees were not bare until near the end of the month.

NOVEMBER.—During November there was a great diminution of barometric pressure over the eastern provinces, whilst in the western portion of the country a large increase took place. In British Columbia the pressure was from .05 inch below average in the southern portion to .05 above in northern districts. In the Territories and Manitoba it was from .05 to .10 above average, and over the remaining portion of the Dominion it was about average. The highest barometric pressure recorded was 30.97 inches at Calgary and Medicine Hat, N.W.T., and the lowest, 28.81 inches at Truro, N.S. The greatest range was 1.83 inch at St. John, N.B., and Truro, N.S. In British Columbia the mean temperature was below average near the Rocky Mountains, but on the lower mainland and Islands it was generally above. In Alberta it was from 10° to 13° below average, whilst eastward to Manitoba this difference decreased to about 3° below. In Ontario the temperature was generally from 1° to 3° below average in northern districts, and from 1° to 2° above in southern counties. In Quebec and the Maritime Provinces it was from 1° to 2° below in most districts. The highest temperature recorded was 68° 0 at Chaplin, N.W.T. on the 1st, and the lowest, —38° 0 at Fort Simpson, N.W.T. The mean daily range was not high, Griffin Lake, B.C. being the only place where it was above 25°, the observer at this place recording 38°. The precipitation with a few exceptions was above average at stations in British Columbia, the North-west Territories, the greater portion of Ontario, Quebec, and the Maritime Provinces, and in Manitoba it was average or slightly above. At stations in Ontario, north of the Lakes, and in the Ottawa Valley there was a deficiency. The proportion of bright sunshine was below average at all stations excepting at Battleford, N.W.T., Brandon, Man., and Winnipeg, Man., where it was above, and at Durham, Ont., where it was average. The mean amount of cloud was 6.5 in British Columbia, 6.0 in the Territories, 4.9 in Manitoba, 7.1 in Ontario, 7.0 in Quebec, 6.6 in New Brunswick, and 7.9 in Nova Scotia. The prevailing direction of the wind was north at Esquimalt, B.C., south-west at Kamloops, B.C., west at Swift Current, N.W.T., north-west at Edmonton, N.W.T., west at Prince Albert, N.W.T., west at Minnedosa, Man., west at Winnipeg, Man., west at Port Arthur, Ont., west at Parry Sound, Ont., west at Port Stanley, Ont., west at Toronto, Ont., south-west at Montreal, Que., west at Quebec, Que., north-west at Chatham, N.B., north-west at St. John, N.B., north-west at Grand Manan, N.B., north-west at Halifax, N.S., and north-west at Sydney, N.S. The only thunderstorms reported were 1 at Ridgeway and 1 at Toronto, Ont., 2 at Grand Manan, N.B., and 1 at Point Le Preaux, N.B. Only 1 fog was reported from Manitoba, and not many were recorded in other portions of the country, excepting 20 at Port Simpson, B.C., 8 at Enderby, B.C., 9 at Gagetown, N.B., and 7 each at West Kootenay, B.C., Fredricton, N.B., and Sable Island, N.S. In the more eastern provinces there were several disastrous storms and some loss of life, and on the Great Lakes there were also some severe gales causing shipwrecks and loss of life. Ploughing in eastern Canada was continued well on towards the end of the month. In the Rocky Mountains of British Columbia wintry weather set in about the 10th. At Kamloops, B.C., the depth of snow on the ground on the 30th was 10 inches. On Vancouver Island some snow fell late in the month but it soon disappeared. In the Territories the rivers froze over permanently about the 8th, and soon after there was enough snow for good sleighing everywhere. In Manitoba sleighing was general on or about the 15th, but in some places ploughing was continued to the 8th. At Stony Creek wild geese were seen on the 18th. On the 30th the ground was bare at most southern stations in Ontario. At Haliburton the lake froze over on the 18th. At Quebec, Que., the first snow an inch in thickness on the 30th. At Owen Sound, on the Georgian Bay, Ont., the ice was scarcely of the season fell on the 1st, and the depth of snow at this and most other stations in Quebec on the 30th was from 2 to 4 inches. At Perce, Que., however, the ground was bare everywhere excepting in the woods. At St. John, N.B., navigation closed on the 28th, the river being permanently frozen over. At Parrsboro, N.B., there was no snow on the ground on the 30th, and no permanent ice had formed. At Charlottetown, P.E.I., there was enough snow for sleighing on the 19th, but it soon disappeared, and the ground was bare on the 30th.

DECEMBER.—In British Columbia the barometric pressure increased during December, it being from .05 inch to .10 inch above average, whilst in the Territories there was a marked decrease, the mean now being about .05 above average. In Manitoba the pressure also decreased, it being about average to .03 below. Elsewhere little change took place, the pressure remaining about average. The highest pressure, 30.89 inches was recorded at Swift Current, N.W.T., and the lowest, 28.79 inches at Port Simpson, B.C. The greatest range was 1.77 inch at Port Simpson and River's Inlet, B.C. The temperature was a little above average in northern Alberta, N.W.T., whilst in British Columbia, the Territories, Manitoba, the Lake Superior District, and southern Ontario it was average or slightly below. In central and eastern Ontario, Quebec and the Maritime Provinces it was average or slightly above. The chief deficiency reported was 4° below at Chatham, N.B., and the chief excess was 3° above at Edmonton, N.W.T. The highest temperature reported was 65° 0 at Vernon, B.C., on the 28th, and the lowest, —45° 0 at Kneehill, N.W.T., on the 17th. The mean daily range of temperature nowhere exceeded 27° 0, and at

most stations it was below $20^{\circ}0$. In British Columbia the precipitation varied considerably, more especially near the coast; at River's Inlet it was 8.3 inches below average, whilst at Kuper Island it was 3.7 inches above. In the Interior the difference was not so great, and upon the whole it was rather below average. In the Territories and eastward to New Brunswick though the precipitation was below average at some stations it was above at far the greater number, and the departures from the normal were nowhere very great. In the Maritime Provinces it was below average. In Manitoba the proportion of bright sunshine was above average, but at stations elsewhere it was below. The mean amount of cloud was 7.5 in British Columbia, 5.5 in the Territories, 5.6 in Manitoba, 7.3 in Ontario, 6.9 in Quebec, 5.6 in New Brunswick, and 6.7 in Nova Scotia. The prevailing direction of the wind at selected stations was north at Esquimalt, B.C., north at Agassiz, B.C., west and north-west at Edmonton, N.W.T., west at Swift Current, N.W.T., north-west at Prince Albert, N.W.T., west at Minnedosa, Man., south-east and north-west at Winnipeg, Man., north-west at Port Arthur, Ont., west at Parry Sound, Ont., west at Port Stanley, Ont., west at Toronto, Ont., east and west at Ottawa, Ont., south-west at Montreal, Que., north-east at Quebec, west at Chatham, N.B., west at Grand Manan, N.B., north-west at St. John, N.B., north-west at Halifax, N.S., and north-west at Sydney, N.S. Thunder was reported from two stations only, namely, River's Inlet and Kuper Island, B.C. Fogs were reported from many stations, but in most cases they did not exceed 4, the greatest number being 29 at Port Simpson, B.C., 11 at Cannington Manor, N.W.T., 9 at Montreal, Que., and 8 at Whitehead, N.S., and Sable Island, N.S. Snow fell throughout British Columbia, but in the western portion the ground was bare or nearly so on the 31st; in the eastern portion there was fair sleighing in many districts during the greater part of the month, but Chinook winds melted most of the snow that fell. In the Territories and Manitoba much of the snow that fell was melted, but there was fair sleighing in most districts. In Ontario the depth of snow varied, it being much less in southern than in the northern portion, at the end of the month there was fair sleighing in most districts. Snow fell frequently in the Province of Quebec, but it was not heavy, and the depth at Quebec on the 31st was only 5.5 inches. In the Maritime Provinces most of the snow that fell had melted by the 31st, and the ground in many districts was quite bare. The thickness of ice on the 31st was 16 inches at Swift Current and Medicine Hat, N.W.T., 10 inches at Winnipeg, Man., 8 inches at Orillia, Ont., 6 inches at Port Stanley, Ont., 9 inches at Chatham, N.B., 6 inches at Charlottetown, P.E.I., 5 inches at Grand Manan, N.B., and 2 inches at Yarmouth, N.S.—F. F. P.
